

Experiment-5

Student Name: Aryan Tiwari

Branch: B.E-CSE Semester: 6th

Subject Name: Project Based Learning

Java with Lab

UID: 22BCS10791

Section/Group: IOT_643-A

DateofPerformance:24-02-2025

Subject Code: 22CSH-359

Aim:

Develop Java programs using autoboxing, serialization, file handling, and efficient data processing and management.

Objective:

- Implement autoboxing and unboxing for efficient data handling.
- Serialize and deserialize objects using file handling.
- Develop a menu-based application for managing employee data with persistence.

Implementation/Code:

Easy Level: Sum of Integers Using Autoboxing & Unboxing

```
import java.util.ArrayList;
import java.util.Scanner;
public class AutoboxingExample {
  public static void main(String[] args) {
    ArrayList<Integer> numbers = new ArrayList<>();
    Scanner scanner = new Scanner(System.in);
    System.out.print("Enter the number of elements: ");
    int n = scanner.nextInt();
    System.out.println("Enter the numbers:");
    for (int i = 0; i < n; i++) {
      numbers.add(scanner.nextInt()); // Autoboxing: int → Integer
    int sum = 0;
    for (Integer num: numbers) {
      sum += num; // Unboxing: Integer → int
    System.out.println("Sum of numbers: " + sum);
```

Discover. Learn. Empower. System.out.print("Enter a number as a string: "); scanner.nextLine(); // Consume newline String strNum = scanner.nextLine(); int parsedNum = Integer parseint(strNum); // Parsing String to

int parsedNum = Integer.parseInt(strNum); // Parsing String to int System.out.println("Parsed number: " + parsedNum);

scanner.close();
}

}

Medium Level: Serialization & Deserialization of a Student Object

```
import java.io.*;
class Student implements Serializable {
  private static final long serialVersionUID = 1L;
  int id;
  String name;
  double gpa;
  public Student(int id, String name, double gpa) {
    this.id = id;
    this.name = name;
    this.gpa = gpa;
  public void display() {
    System.out.println("ID: " + id + ", Name: " + name + ", GPA: " + gpa);
}
public class StudentSerialization {
  public static void main(String[] args) {
    String filename = "student_data.ser";
    Student student = new Student(101, "Kamalpreet", 3.9);
    try (ObjectOutputStream oos = new ObjectOutputStream(new FileOutputStream(filename))) {
      oos.writeObject(student);
      System.out.println("Student object serialized successfully.");
    } catch (IOException e) {
      System.out.println("Serialization Error: " + e.getMessage());
    try (ObjectInputStream ois = new ObjectInputStream(new FileInputStream(filename))) {
      Student deserializedStudent = (Student) ois.readObject();
      System.out.println("Deserialized Student:");
      deserializedStudent.display();
    } catch (FileNotFoundException e) {
      System.out.println("File not found: " + e.getMessage());
    } catch (IOException | ClassNotFoundException e) {
      System.out.println("Error: " + e.getMessage());
```

Hard Level: Employee Management System Using File Handling

```
import java.io.*;
import java.util.Scanner;
class Employee implements Serializable {
  private static final long serialVersionUID = 1L;
  int id;
  String name, designation;
  double salary;
  public Employee(int id, String name, String designation, double salary) {
    this.id = id;
    this.name = name;
    this.designation = designation;
    this.salary = salary;
  public void display() {
    System.out.println("ID: " + id + ", Name: " + name + ", Designation: " + designation + ", Salary: $" + salary);
}
public class EmployeeManagement {
  private static final String FILE_NAME = "employees.dat";
  public static void main(String∏ args) {
    Scanner scanner = new Scanner(System.in);
    int choice;
    do {
       System.out.println("\nMenu:");
       System.out.println("1. Add Employee");
       System.out.println("2. Display All Employees");
       System.out.println("3. Exit");
       System.out.print("Enter your choice: ");
       choice = scanner.nextInt();
       scanner.nextLine();
       switch (choice) {
         case 1:
           addEmployee(scanner);
           break;
         case 2:
           displayEmployees();
           break;
         case 3:
            System.out.println("Exiting...");
           break;
         default:
           System.out.println("Invalid choice! Try again.");
```

DEPARTMENTOF

COMPUTERSCIENCE&

```
Discover. Learn. Empower.
  } while (choice != 3);
  scanner.close();
private static void addEmployee(Scanner scanner) {
  System.out.print("Enter Employee ID: ");
  int id = scanner.nextInt();
  scanner.nextLine();
  System.out.print("Enter Name: ");
  String name = scanner.nextLine();
  System.out.print("Enter Designation: ");
  String designation = scanner.nextLine();
  System.out.print("Enter Salary: ");
  double salary = scanner.nextDouble();
  Employee emp = new Employee(id, name, designation, salary);
  try (ObjectOutputStream oos = new ObjectOutputStream(new FileOutputStream(FILE_NAME, true))) {
     oos.writeObject(emp);
     System.out.println("Employee added successfully.");
  } catch (IOException e) {
     System.out.println("Error saving employee: " + e.getMessage());
  }
}
private static void displayEmployees() {
  try (ObjectInputStream ois = new ObjectInputStream(new FileInputStream(FILE_NAME))) {
     while (true) {
       Employee emp = (Employee) ois.readObject();
       emp.display();
  } catch (EOFException e) {
     System.out.println("All employees displayed.");
  } catch (IOException | ClassNotFoundException e) {
     System.out.println("Error reading file: " + e.getMessage());
  }
}
```

Output:

}

```
Easy-
Enter the number of elements: 3
Enter the numbers:
1
2
3
Sum of numbers: 6
Enter a number as a string: 10
Parsed number: 10
```

Medium-

Student object serialized successfully. Deserialized Student: ID: 11720, Name: Kamalpreet, GPA: 8.4

Hard-

```
Enter your choice: 1
Enter Employee ID: 11720
Enter Name: Kamalpreet Singh
Enter Designation: Data Scientist
Enter Salary: 450000
Employee added successfully.
Menu:

    Add Employee

2. Display All Employees
Exit
Enter your choice: 1
Enter Employee ID: 10543
Enter Name: Deepak Rajput
Enter Designation: Cloud Expertt
Enter Salary: 350000
Employee added successfully.
Menu:

    Add Employee

Display All Employees
Exit
Enter your choice: 2
All Employees:
ID: 11720, Name: Kamalpreet Singh, Designation: Data Scientist, Salary: $450000.0
ID: 10543, Name: Deepak Rajput, Designation: Cloud Expertt, Salary: $350000.0
Menu:

    Add Employee

2. Display All Employees
Exit
Enter your choice: 3
Exiting...
```

Learning Outcomes:

- Understand autoboxing and unboxing for automatic type conversions.
- Learn object serialization and deserialization using file handling.
- Implement exception handling for robust applications.
- Manage employee records with file storage for data persistence.
